## SUMMARY

Full Stack Engineer with experience in modern JavaScript frameworks. Clean UI's and informative graphics are my specialty. I care about declarative code, vigilant testing, and data driven design. Seeking dynamic teams, experienced mentors, and ambitious projects.

## WORK EXPERIENCE

**Contract Engineer**, Health-Kick.com
Jan 2016 - March 2016

- Migrated site from a drag-and-drop solution to a Ruby-on-Rails application
- Planned and built responsive UI for browsing health and fitness deals

**Front End Web Engineer**, TheLadders.com
Dec 2014 - Nov 2015

- Boosted sign-ups by building search engine optimized salary information pages
- Created salary data visualizations using D3
- Updated and maintained the core Backbone application
- Prototyped and created a resume review tool with React

## PROJECTS

**Picaday**, In-progress web app for documenting change with one picture a day

- Designed and built responsive UI components with React and SCSS
- Built RESTful API for managing users, sessions, followers, and images
- Implemented image manipulation with MiniMagick and storage on AWS S3

**Library Catalogue**, Heartwood School For Homebuilding Crafts

- Designed and built catalogue for small library using Ruby-on-Rails
- Worked with users to determine application requirements

## EDUCATION

**The Recurse Center,** *"a self-directed learning retreat for programmers"*
Sept - Nov 2014

- Pair programmed and collaborated with talented programmers from around the world
- Presented on the technical details of web development projects
- Built web browser versions of classic arcade and board games
- Implemented algorithms and data structures

**Bucknell University,** *B.A. in Economics*
Sept 2007- May 2011
